South University's campus in West Palm Beach is centrally located in Palm Beach County, close to beaches and accessible to Interstate 95 and the Palm Beach International Airport. In 2010, the West Palm Beach campus moved into a new facility designed specifically to support the campus's growing population. The location consists of a 32,000-square-foot, three-building campus. The West Palm Beach campus has engendered a relationship with the surrounding community, reaching out to its neighbors to participate in community activities and host special events.

A diverse, multicultural student body thrives on a supportive learning environment fostered by the faculty and staff. In keeping with South University's educational mission, they are committed to the academic success of their students and to producing graduates who are prepared for the challenges of entry into professional life.

The campus library provides individual and group study areas, a computer lab, and a diversified collection of audiovisual, and print materials. Professional librarians are available during all hours of operation to help students locating information and materials at South University's libraries and at others. An online library portal with access to more than 60 databases in all disciplines is available electronically 24/7 to all authorized students and faculty on and off campus. More than 50,000 digital textbooks, video clips, images, and full-text dissertations are also included in the library offerings. The collections include books, magazines, audiovisual and digital sources that support class assignments, tutorial needs, current events and recreational reading. The computer lab offers Internet access, online databases with indexing and full-text access to thousands of journals, tutorial programs, a suite of office software programs, and tutorial and other class support software.
