

MHA6999 : Seminar in Healthcare Cases

This course is designed to bring together knowledge gained from the previous program courses. The focus of the course is on the application of knowledge in the management of a healthcare organization broadly emphasizing complex healthcare administration concepts covered throughout the program of study. This course is designed to demonstrate the skills needed to perform the management role by making day-to-day and strategic decisions involving human resources, financial, information system, planning, and operational issues.
