

# LGS4045 : Advanced Technology for Paralegals

The purpose of this course is to explore electronically stored information (ESI) with an emphasis on managing ESI. Students will analyze the leading cases, existing and pending rules, and prepare several drafting assignments, including motions and supporting memoranda. Student will learn about emerging technologies of electronic filing of court documents with an understanding of the architecture and usability of popular litigation support and trial presentation software used currently in law offices. Students will be given different client scenarios and generate associated legal content.
