

NSG8105 : Capstone in Applied Practice II

In this second of the four-course series, the DNP student works with a faculty mentor to refine the project design and apply contemporary investigative methods to structure data collection. Additionally, the DNP student will complete CITI/NIH training and submit an IRB application for Human subjects review where appropriate, prior to beginning data collection for this scholarly project. Students must successfully complete an oral defense of the project prior to implementation. Each student will be required to submit individual objectives at the beginning of the semester for each of the four courses. The objectives will be signed by the student and the mentor. The student will be evaluated according to the requirements of the course within the context of the agreed-upon objectives. A grade of B or better is necessary in order to successfully pass this course.

Credits 1.0

Prerequisites

[NSG7000](#), [NSG7005](#), [NSG7010](#), [NSG7015](#), [NSG7020](#), and NSG7221, NSG7222 or NSG7223 (if required)
