

# NSG8115 : Capstone in Applied Practice IV

In this fourth and final course, the DNP student conducts the data analysis and writes the discussion section of the scholarly project. The discussion focuses on evaluation of the evidence generated in the scholarly project and the actual or potential impact of the project on identified health care outcomes. Students disseminate their findings through a final oral presentation (defense) and preparation of a manuscript suitable for a peer-reviewed publication. Each student will be required to submit individual objectives at the beginning of the semester for each of the four courses. The objectives will be signed by the student and the mentor. The student will be evaluated according to the requirements of the course within the context of the agreed-upon objectives. A B or better is necessary to successfully complete this course.
