

PHA4247 : Pharmaceutical Care for Patients with Diabetes

This course will provide the student with a detailed review of diabetes pathophysiology and management including special emphasis on diet and pharmaceutical management. The course will give the student a foundation of knowledge to help practice medication therapy management for patients with diabetes. Students will also be given projects throughout the quarter that teach them empathy for the patient with diabetes (i.e. keeping food diaries, taking blood sugar, etc.) Upon successful completion of the course, the student will be awarded a certificate stating that they have completed APhA's Pharmaceutical Care for Patients with Diabetes course.
