

PHA5379 : Postgraduate Opportunities, Pharmacy Residencies

This elective course offers a candid review of postgraduate opportunities with emphasis on residencies and postgraduate research training. Through faculty led topic discussions and the completion of assignments, students will learn the benefits of a pharmacy residency and post-graduate research training, the usual requirements, and the diversity of training environments. Students will also appreciate the necessary steps to find and secure a postgraduate year one (PGY1) residency or post-graduate research training.
