

PHA5393 : Integrated Sequence VII - Central Nervous System

This course is a continuum of the Integrated Sequence modules with an emphasis on the central nervous system. The course is devoted to discussing specific therapeutic classes and chemical subclasses of drugs, their relationships to drug structure and activity with regard to the dynamics of disposition, metabolism, and both primary and secondary receptor interactions. The course will provide students with the information they need to develop rational therapeutic recommendations and discuss the clinical significance of therapeutic monitoring.
