

PHA6528 : APPE IV: Advanced Institutional Rotation

Advanced institutional pharmacy experiences provide comprehensive, evidence-based, individualized, patient-centered care to a diverse population in the institutional health-system setting. Pharmacists are expected to be accountable for the patient's drug therapy outcomes and work collaboratively with other healthcare professionals. This experience is distinguished from introductory institutional pharmacy experiences through greater emphasis on broad-based operational duties, regulatory compliance, medication procurement, and formulary and personnel management while still participating in distributive functions (e.g. sterile and non-sterile compounding, dispensing technologies).
