

PTA2057 : Physical Therapy through the Lifespan

This course focuses on a review of pathologies that could require physical therapy intervention in clients through the life span. The course will include discussion of diagnoses and associated physical therapy interventions for the neonate, child, and adolescent; physical therapy interventions for women's health issues including pregnancy; the effect of aging on multiple systems; and end of life care. It is meant as a final preparatory course before the student goes out into the clinic.
