

# PAS5190 : Essentials of Emergency Medicine

Evaluation and management of patients with emergent and urgent health conditions influence physician assistants in all disciplines of medicine. Students examine effective interviewing methods, physical examination techniques, and pharmacological principles to treat emergent and urgent conditions across the life span. Through discussion and case-based analysis, students integrate evaluation techniques and management of patients in the emergent setting.

**Credits** 4.0

**Prerequisites**

Successful completion of coursework in preceding academic quarter

**Corequisites**

None
