

PMC6601 : Foundations of Project Management

This course introduces students to the challenges associated with projects in the business arena. The course introduces the terms and conceptual framework for Project Management as detailed in the ANSI Standard Guide to the Project Management Body of Knowledge (PMBOK Guide). The course focuses on the processes of project integration management including initiating projects, project planning, executing project plans, controlling and monitoring project work, and closing the project. The course reviews the nine knowledge areas in the PMBOK Guide. Students also analyze how project management disciplines such as leadership, ethics, strategic management, operations management, and human resources management utilize project management processes.
